Abhijit

I thought you would like to see the forwarded message. You need to ignore the comments as apparently they are scrambled and may not belong to our course. However, the figures are truly astonishing. I think this probably places us as the top engineering course in the country. You can probably check on the National Student Survey Website.

Anyway the reason for sending this to you is that it is to your credit that we are here. You should be delighted that this is your passing gift to the Department as Director of Studies. An heroic achievement!

Nick
