

```
char* strcpy(char* s1, const char* s2)
```

```
{ char* p = s1, n = 0
```

```
while (*p *p++ = *s2++);
```

```
printf("%i", n);  
return s1;
```

Now will this printf behave

This would go till.

strlen(s2).

s1 = HELLO \0

s2 = HE

s1 = HE \0 LO \0

c = a > b

x = . . .
