

Bollywood Actors network

Group members:

Balakaushal Damaraju

Ravi Tandon

Abstract

This network consists of all bollywood actors who have acted in the films from 1970-2006 will be the nodes of the network. If 2 particular actors have co-acted in same film then there will be link between them. The weight of the link is equal to the number of films they have co acted. Some actors of another film industry are also being considered so that we can find out the relationship of these industries with bollywood.

All the standard relationship degrees can be found between different actors or actor communities.

We can draw many conclusions such as:

1. Which star has acted in most multi-starrer movies?
2. In which decade, most multi-starred movies has released?
3. Which actor belongs to highest no. of actor communities?

And many more,
